

# Contents

Front Matter . . . . .	i
Introduction 1: Essential Classical Mechanics . . . . .	3
Introduction 2: Blackbody Radiation . . . . .	11
Introduction 3: Photoelectric Effect . . . . .	17
Introduction 4: Introduction to Spectroscopy . . . . .	25
Introduction 5: The Energies of Molecules . . . . .	31
Introduction 6: Bohr Model . . . . .	41
Fundamental 1: The Postulates of Quantum Mechanics . . . . .	47
Extension 1: Introduction to Operators and Eigenvalue Equations . . . . .	55
Fundamental 2: The Particle-on-a-Line Model . . . . .	61
Fundamental 3: The Language of Quantum Mechanics . . . . .	71
Extension 3.1: Hermitian Operators . . . . .	81
Extension 3.2: The Heisenberg Uncertainty Principle . . . . .	87
Fundamental 4: Molecular Translation . . . . .	95
Extension 4: Separation of Variables . . . . .	103
Spectroscopy 4: Population of Quantum States . . . . .	109
Fundamental 5: The Particle-on-a-Spring Model . . . . .	117
Extension 5.1: Two-Particle Systems . . . . .	123
Extension 5.2: Even and Odd Functions . . . . .	129
Fundamental 6: Molecular Vibration . . . . .	133
Spectroscopy 6.1: Vibrational Spectroscopy . . . . .	139

Spectroscopy 6.2: Vibrational Constants . . . . .	147
Fundamental 7: The Particle-on-a-Ring Model . . . . .	155
Fundamental 8: Molecular Rotation . . . . .	163
Spectroscopy 8.1: Rotational Spectroscopy . . . . .	171
Spectroscopy 8.2: Vibrational Rotational Spectroscopy . . . . .	179
Fundamental 9: The Hydrogen Atom . . . . .	187
Fundamental 10: Hydrogen Radial Functions . . . . .	195
Fundamental 11: Hydrogen Orbitals . . . . .	203
Fundamental 12: Multielectron Atoms . . . . .	211
Fundamental 13: Electron Configurations . . . . .	219
Fundamental 14: Electron Spin . . . . .	225
Extension 14: Slater Determinants . . . . .	233
Fundamental 15: Term Symbols . . . . .	239
Spectroscopy 15: Electronic Spectroscopy I: Atoms . . . . .	247
Fundamental 16: Born Oppenheimer Approximation . . . . .	255
Extension 16: Molecular Energy Integrals . . . . .	265
Fundamental 17: Linear Combinations of Atomic Orbitals . . . . .	271
Fundamental 18: Diatomic Molecules . . . . .	279
Spectroscopy 18: Electronic Spectroscopy II: Molecules . . . . .	285
Extension 18: Huckel Theory . . . . .	293
Symmetry 1: Group Theory . . . . .	305
Symmetry 2: Symmetry Adapted Molecular Orbitals . . . . .	315
Extension Sy2: Ethylene Molecular Orbitals . . . . .	325
Symmetry 3: The Symmetry of Vibrational Modes . . . . .	331
Appendix . . . . .	337
